RESEARCH EXPERIENCE

08/2021 - present **Apte Group Laboratory** Berkeley, CA
Graduate Research Assistant
- Developing an open-source modeling tool to streamline exposure equity analyses in coordination with the California Office of Environmental Health Hazard Assessments.
- Investigating air pollution exposure equity impacts of climate mitigation policies.

02/2017 – 01/2018 **Cziczo Group Laboratory** Cambridge, MA
Graduate Research Fellow
- Designed and constructed a first of its kind comprehensive phase-separation inlet system for studying the aerosols that activate water droplet and ice crystal nucleation in mixed-phase clouds.
- Demonstrated proof of concept during a field campaign at the summit of Mt. Washington by measuring mixed-phase clouds using the inlet.
- Published results in Koolik *et al.*, Atmos. Meas. Tech. (2022).

09/2015 – 12/2016 **Cziczo Group Laboratory** Cambridge, MA
Undergraduate Researcher
- Designed and tested the first 3D printed prototype of both an aerosol size-selecting device and a particle concentrator to allow for a more thorough investigation of cloud nucleating particle properties.

08/2014 – 12/2014 **Selin Group Laboratory** Cambridge, MA
Undergraduate Researcher
- Compared levels of ozone and particulate matter in different policy scenarios with overall costs of implementation.
- Performed BenMAP simulations, contributing to results published in a paper entitled "U.S. Air Quality and Health Benefits from Avoided Climate Change under Greenhouse Gas Mitigation" (Garcia-Menendez 2015).
